

APC Reporting and Certification

Trusted APC Data for Confident Reporting

Overview

TransTrack's Automatic Passenger Counter (APC) Module simplifies APC reporting and certification by automating data cleansing, expansion, and validation in one centralized solution.

Built for transit agencies managing complex ridership data, it reduces manual work, improves data accuracy, and streamlines FTA certification.

Backed by 20+ years of transit expertise, the APC Module combines built-in statistical support with transparent data processing, giving agencies and stakeholders confidence in the results.

Top Features

Consolidate Data from APC, AVL, and Fare Systems

270+ Built-In Reports & Hundreds of Metrics

Automate APC Data Cleansing & Validation

Track Ridership at the Stop, Route, and System Level

Streamline Ride Sampling with the Ridecheck App

Solution Benefits

Ensure compliance with FTA certification standards

Eliminate manual reporting and spreadsheets

Validate APC data with confidence

Cleaner, more reliable ridership data

Understand rider behavior and improve service planning
